

Education

VIT Bhopal University	Bhopal, Madhya Pradesh, India
B.Tech in Computer Science (AI & ML)	2023 – 2027
CGPA: 9.22	
St. Mary’s Senior Secondary School (CBSE)	Banda, Uttar Pradesh, India
Class XII: 82.2%	2022 – 2023
Class X: 97%	2020 – 2021

Technical Skills

- **Programming Languages:** Python, C++, Java, JavaScript, HTML, CSS
- **Frameworks & Tools:** React.js, FastAPI, Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle, SQL, pytest
- **Libraries & Technologies:** NumPy, Pandas, scikit-learn, TensorFlow, PyTorch, OpenCV, YOLO, NLTK, Matplotlib, Keras
- **AI/ML:** Machine Learning, Deep Learning, NLP, Computer Vision, CNNs, LSTMs, Reinforcement Learning, Behavioral Analytics, Model Evaluation
- **Platforms:** Linux, Windows, Amazon Web Services
- **Soft Skills:** Leadership, Communication, Problem Solving, Teamwork, Time Management

Experience

NetZero Aqua	Dec 2025 – Mar 2026
Intern (Full-time), Remote	
• Designed and developed a complete web application to support organizational workflows and operational data presentation. • Extracted aquaculture and environmental datasets using Microsoft Planetary Computer Explorer APIs for analytical processing. • Processed and analyzed datasets using statistical and mathematical computations for water quality parameter evaluation including pH, alkalinity, and turbidity.	

Projects

HerSakhi – AI-Powered Women Wellness Platform	Apr 2026 – May 2026
• Developed a full-stack AI-powered wellness platform focused on women’s health, mental wellness, emotional support, and personalized wellbeing assistance. • Built responsive frontend interfaces using React.js and integrated FastAPI backend services with secure authentication and scalable workflows. • Designed intelligent wellness modules, user interaction systems, and AI-assisted support features for enhanced user engagement. • Deployed and managed the application using Vercel and Render with Git-based version control and deployment workflows.	
Cognivue – AI Cognitive Productivity & Focus Analysis System	May 2026 – June 2026
• Developing an AI-driven cognitive analytics system to monitor focus patterns, posture tracking, productivity levels, and burnout indicators in real time. • Integrating Computer Vision, Deep Learning, and behavioral analytics techniques for intelligent workspace and attention analysis. • Designing productivity dashboards for workplace and educational usage with focus tracking, performance scoring, session analytics, and behavioral insight visualization. • Implementing modular AI pipelines using OpenCV, PyTorch, FastAPI, and visualization frameworks for scalable analysis systems.	
AI-Based Pothole Detection and Mapping System	Sep 2025 – Mar 2026
• Built a pothole detection system using YOLOv8 and DETR models on image and video datasets for automated road damage identification. • Compared model performance using Precision, Recall, and mAP evaluation metrics to improve detection accuracy.	

Certifications

NPTEL - Introduction to Internet of Things	Apr 2026
Coursera - Machine Learning with Python	Jan 2026
AWS - Cloud Practitioner Essentials	Sep 2025
NPTEL - Cloud Computing	May 2025
MathWorks - MATLAB Onramp	Aug 2023
